dhruv-mulani Boss.Hack3r

PROFILE

- Cybersecurity practitioner specializing in **CTFs, vulnerability research, and security automation**, focused on identifying and analyzing system weaknesses.
- Developing **AI-assisted security tools, exploit development scripts, and automated agents** to streamline vulnerability discovery and offensive security workflows.

EDUCATION

Bachelor of Engineering in Computer Engineering Final Year 2023 – 2027
Institute of Infrastructure, Technology, Research, and Management (IITRAM) Ahmedabad, India
Relevant Coursework: Operating Systems, Computer Networks, Cybersecurity Fundamentals, Data Structures, Cryptography, Digital Forensics, Web Security

WORK EXPERIENCE

Cyber Octet - Intern 11/2025 – 11/2026
(VAPT - Vulnerability Assessment and Penetration Testing) Ahmedabad, Gujarat
- Performed **vulnerability assessment and basic penetration testing** on web applications and systems to identify security weaknesses.
- Conducted **reconnaissance, scanning, and analysis** using tools such as **Nmap and Burp Suite** following **OWASP testing methodologies.**

SarthiBus – Bug Hunter 08/2025 – 12/2025
Surat
- Discovered and reported financial tampering vulnerability
- Assisted in implementing security fixes and best practices
- Awarded Certificate of Appreciation for contributions

CodTech – Intern (Cybersecurity & Ethical Hacking) - 2 Months 01/2025 – 03/2025
Ahmedabad
- Developed a file integrity checking system
- Conducted penetration testing and API security audits
- Implemented real-time threat detection mechanisms

SKILLS

Cybersecurity Expertise: Red Teaming, Bug Bounty, OSINT, IMINT, Windows Forensics, CTFs, Security Research

Tools & Technologies: Git, Docker, Linux, Nessus, Wireshark, Burp Suite, Metasploit, Nmap, SQLMap.

Programming Languages: C, C++, Python, HTML, CSS, JavaScript

Soft Skills: Leadership, Public Speaking, Teamwork, Critical Thinking, Technical Writing

PROJECTS

LOGify
LOGify is a complete log management platform combining a powerful CLI agent with a modern cloud dashboard
- Automated log management system that **collects and organizes logs efficiently**, reducing manual monitoring effort.
- Enables faster **system activity analysis and troubleshooting**, helping teams save time and improve operational efficiency.

Online Healthcare System 2.0
Full-stack implementation with Firebase, Node.js (Backend), and HTML, CSS, JavaScript (Frontend)
- Developed a **secure online healthcare platform** that streamlines appointment handling, patient records, and service management in a centralized system.
- Improves **operational efficiency and user experience** by reducing manual processes and enabling faster, organized access to healthcare services.

ACHIEVEMENTS

14th Place
ISEA-ISAP CTF'26 organized by IIT Madras - with 1613 points

Winner
Cyber Shadez'26 National TechFest: Bug Bounty

Top 3%
TryHackMe

CERTIFICATES

Certifications
IIT Bombay Workshop, Belkasoft Windows Forensics & Advanced Forensics Certificates, TryHackMe - love_at_first_breach

Competitions
CybershadezCTF, VishvaCTF, Multiple CTF challenges on Hack The Box, AsurCTF, DoomsplayCTF

Certificate of Appreciation
SarthiBus for discovering a major financial tampering vulnerability

Hackathons
NeuraCode AI Innovation Sprint
TryHackMe Hackfinity
